Peers Conference returns for the **7th year**, confirming that an event centered on people, sharing and growth is **good for business**. Your partnership supports a community of web and software developers, freelancers and agency owners who hail from across the US, and travel from more than 10 countries to participate. Our attendees call the shots–and indentify as those **in charge of making decisions** about products and process.

Hate being stranded in a booth, away from the crowd? We don't do that. Peers focuses on **interaction with our attendees and speakers** with **plenty of time for one-on-one**. Peers is an **inclusive** event that distinguishes itself with quality content, **professionalism** and an impressive, **diverse speaker roster**. Join us!
